## 1- LATTICE MODE FUNCTION :

(1)Treatment strawberry skin

(2)Removal deep wrinkles and the pigmentation for the lips

(3)Stretch marks removal

(4)Upper Eyelids lifting (the client must be wear eyeball proctors)

(5)Scar removal

(6)Face and body pigmentation removal

(7)Skin Resurfacing

(8)Wrinkle removal

(9)Skin tightening

## Treatment Parameter :

Power : 3-7W adjustable

RESIDENCE TIME : 0.6 ms

Interval Time : 1.0 ms

Point Spacing : 0.6 mm

Scan mode : Random

Scan times: 1 th

**Single Mode:** When you press pedal one time ,the machine only working one time , It can accurately control working time. used to remove skin neoplasm

**Continous Mode:**

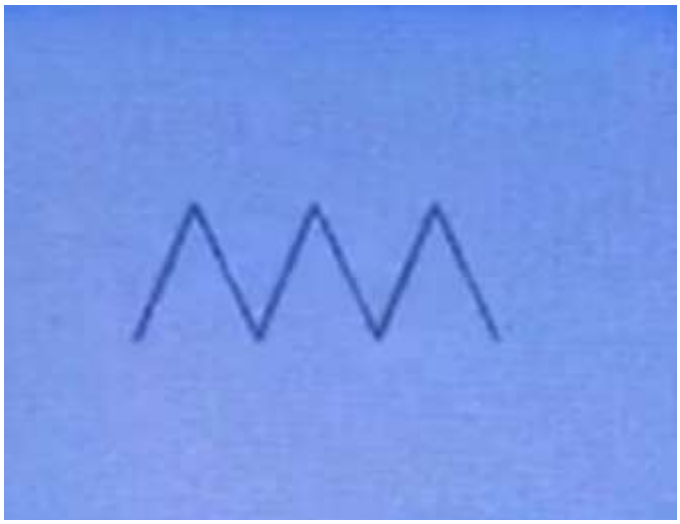

Continues working ,keep same energy for each treatment area , Generally It is not used for cosmetic treatment

(gradually drying skin tissue during continue mode working , The temperature can reach at 600 ℃, please be careful with this operation), Commonly used for Medical cutting, irradiation etc

**Pulse Mode:**

Super pulse , The smaller the frequency, the longer the time interval, the less the relative damage , the operation handle can be a bit near the treatment area ,then the light spot is bigger , the less the relative damage

## 3- Private mode Function :

(1)Vaginal rejuvenation

(2)Vaginal tightening

(3)Vrine Incontinence

(4)Shrink vagina

(5)Beautify vagina

(6)Maintenance vagina
